m Duration: 4-6 months

About Tradrly

Tradrly

Tradrly is an innovative startup based in Mahdia, Tunisia, dedicated to transforming visionary ideas into cutting-edge Al-powered products. We specialize in delivering bespoke applications across web, mobile, and artificial intelligence technologies.

Our Mission

Driving digital transformation for businesses globally through innovative Al solutions that create real impact.

Key Specializations

AI-Powered Products

Intelligent solutions leveraging machine learning and data science

Mobile Development

Cross-platform mobile applications for iOS and Android

Web Technologies

Modern web applications with responsive design

Digital Transformation

Strategic implementation of digital technologies

Our Core Values

At Tradrly, our operations are guided by these fundamental values that foster a dynamic and productive environment:

Innovation

We are committed to pushing the boundaries of technology, constantly seeking new and creative solutions to complex challenges.

Transparency

We believe in fostering open communication and clear processes, ensuring clarity in all our interactions.

Collaboration

We work as true partners, both with our clients and within our team, to achieve shared goals and maximize impact.

Excellence

We strive for technical excellence in every project, delivering solutions that consistently exceed expectations.

Continuous Learning

We are dedicated to ongoing growth and skill development, encouraging our team members to expand their expertise and adapt to evolving technological landscapes.

Values Integration

Our core values are integrated into every aspect of our operations, from project planning to delivery, ensuring they guide our decisions and actions.

Why Work With Tradrly

Undertaking a PFE (Projet de Fin d'Études) at Tradrly offers a unique and enriching experience for students. Here's why you should consider joining us:

Hands-on Mentorship

Benefit from direct guidance by industry experts who will provide practical insights and professional guidance in your chosen field.

Real-world Projects

Contribute to impactful projects that leverage cutting-edge Al, mobile, and web development technologies to solve real-world challenges.

Dynamic Startup Environment

Be part of a fast-growing startup that is actively redefining the future of technology, fostering innovation and creativity.

Professional Growth

Develop your technical skills and professional capabilities through challenging projects and continuous learning opportunities.

"As part of a dynamic and fast-growing startup, students become integral to a team that is actively redefining the future of technology."

Project Portfolio Overview

Discover a diverse range of innovative PFE projects for 2026-2027, carefully designed to align with cutting-edge technological domains and student career aspirations.

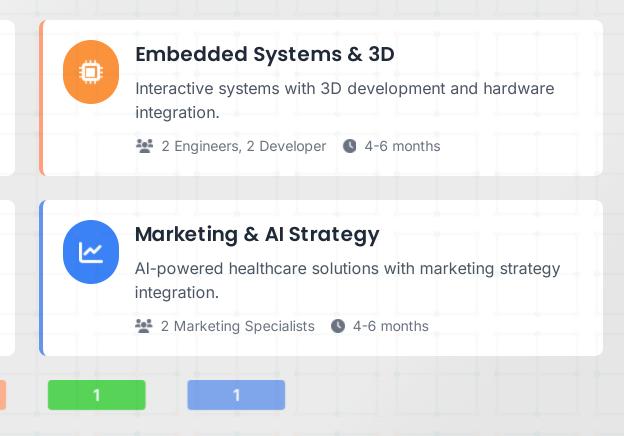

2 Mobile Developer 4-6 months

Smart mobile applications with IoT connectivity and

Mobile & IoT

integration.

Al & Data Science Projects

Oid you know? Both projects leverage advanced Al algorithms to create personalized experiences and track user progress over time.

Embedded Systems & 3D Development

SmartMirror X

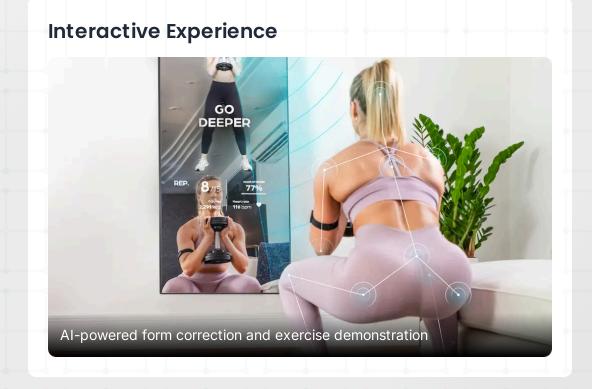

Interactive AI fitness mirror

Transform your home workout with SmartMirror X, an interactive Al fitness mirror that provides real-time coaching and integrates with your smart home.

Team

2 Embedded Systems Engineers, 1 Unity 3D Developer

Mobile & IoT Development

A smart mobile app integrating VirtuCoach and SmartMirror X, tracking performance, metrics, and progress.

O Duration: 4-6 months

Team: 2 Mobile Developer

React Native

Node.js

Integration Ecosystem

SmartMirror X Interactive Fitness

Mirror

Key Features

Performance **Tracking**

Monitor and analyze fitness metrics in real-time

Mobile Integration App

User Progress

Track personal progress over time
