FULL-STACK DEVELOPER

Yaluna Media

About us

Yaluna is a solutions-oriented media platform. We spotlight the contemporary issues facing young people in Tunisia and focus on the actions of youth who are making a positive impact on the country.

Yaluna Media

Position

Full-Stack Developer Intern (Laravel, React, PostgreSQL).
Tunis — on-site or in hybrid mode

Yaluna Media

Profile

- Final year project student in development, engineering or similar field.
- Excellent command of Laravel (PHP) & React (JavaScript/TypeScript).
- Good knowledge of relational databases, especially PostgreSQL.
- Proficiency in Git/GitHub , GitAction and collaborative workflows.
- Comfortable with Linux environments and self-hosted deployment.
- Autonomy, curiosity, attention to detail.
- Ability to solve complex problems and work in a team within an agile framework.

Yaluna Media

Responsibilities

- Design, develop and improve web applications with Laravel & React.
- Create and optimize robust and scalable PostgreSQL databases.
- Collaborating with design, product and technical teams to deliver intuitive features.
- Manage deployment and maintenance on Linux (bare-metal) servers.
- Participate in versioning, continuous integration and code reviews via GitHub.
- Implement a complete CI/CD pipeline using GitHub Actions for automated testing and deployment.
- Produce clear, documented, secure, and maintainable code.
- Diagnose, correct and optimize the performance of existing systems.

Strengths

- Experience with Docker, Ansible or automation tools.
- Knowledge of REST APIs, integration of external services.
- Interest in security, server optimization and distributed systems.
- Experience in a startup or agile environment.
