PFE Topics

**Full
Stack Development**

Energy

Artificial Intelligence

Full Stack Development

Topic 1 : Development of an Internal Company ERP

- Development of an internal ERP system to manage the company's activities (inventory, HR, projects, etc.).

Topic 2 : Development of a Web Platform for Infrared Energy Monitoring and Smart Analysis

- Design and develop a complete web platform that connects to the infrared camera system, collects thermal data, displays real-time insights, and provides dashboards for energy efficiency analysis.

Technologies: Flutter – Django

Skills: Full-stack development, UI/UX design with Figma, deployment and system integration

2 Interns

4-6 months

Technoparks Manouba (hybrid)

Artificial Intelligence

Topic : AI Models for Thermal Image Analysis and Intelligent Energy Diagnostics

- Build and train AI algorithms to process infrared images, detect energy losses, classify thermal anomalies, and generate intelligent recommendations for energy optimization

Experience with programming languages (Python/C), AI, data analysis, data visualization, and electronics(is a plus).

1 Intern

4-6 months

Technoparks Manouba (hybrid)

Energy

Topic : Development of an Intelligent Carbon Analysis and Energy Decision Support System

- Design a system for precise CO₂ calculation , interactive CSR dashboards, AI-based anomaly detection, and energy-efficiency recommendations.

Experience in energy , data analysis, AI/ML.

2 Interns

4-6 months

Technoparks Manouba (hybrid)

How to Apply ?

To apply, please send your CV to the email below

contact@4inatechnologie.com

Kindly mention the position you are applying for in the subject line

We look forward to connecting with you soon!

Thank You!
