# ABOUT US

---

**Consultim-IT is a leading IT consulting firm that empowers organizations to accelerate their digital transformation, enhance operational efficiency, and reinforce cybersecurity. Leveraging deep technical expertise, agile delivery, and strategic guidance, we design practical, high-impact solutions, now strengthened by advanced AI capabilities to help modern enterprises innovate faster and smarter.**

At Consultim-IT, we empower organizations with **secure**, **scalable**, and **innovative** IT solutions that drive efficiency and growth.

# OUR SERVICES

we help organizations accelerate their digital transformation journey through three key service domains:

01

## Business App Development

We design and develop modern business applications that streamline processes, enhance productivity, and deliver measurable business value.

02

## Modern Workplace Solutions

We enable organizations to connect people, content, and processes with the Microsoft 365 ecosystem, empowering secure collaboration and hybrid work.

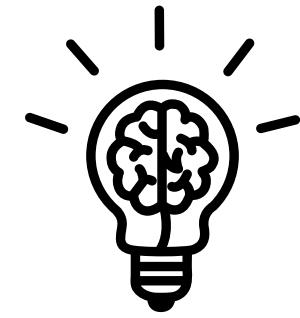

03

## Security & Compliance

We help organizations strengthen their security and compliance by assessing their current environment, identifying vulnerabilities, and providing tailored consulting to address specific challenges.

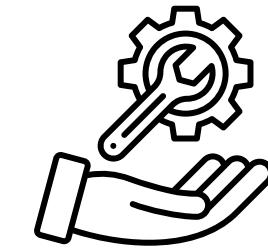

# WHAT WE OFFER

**Growing Competences**

**Support**

**Technical Training**

**Hiring Possibility**

# HOW TO APPLY

# OUR PROJECTS

---

1. Gamified Learning Platform for Kids in Coding and AI
2. Intelligent Monitoring Platform for Business Application Health and Resilience
3. Secure AI Assistant for Conversational Access to Documents and Emails
4. AI-Driven Crisis Simulation and Resilience Testing Platform
5. AI Content Orchestration Agent
6. Intelligent HR Assistant
7. Zero Trust Enforcement & Validation Simulator
8. Quantitative Cyber-Resilience Validation Framework (QCRVF)
9. Automated Intune Configuration Auditing, MDE Validation, and Proactive Remediation Pipeline

# 1. Gamified Learning Platform for Kids in Coding and AI

---

## Project Description:

A gamified learning platform that helps children discover coding, critical thinking, and AI concepts through interactive challenges and creative play. The system offers adaptive learning paths, combines engaging game mechanics with progressive levels, and provides real-time feedback to keep learners motivated while building solid, future-ready digital skills.

Technologies / Skills	Profile	Duration	Number of slots
Full stack .NET	Bac + 5	6 Months	2 Slots

## 2. Intelligent Monitoring Platform for Business Application Health and Resilience

---

### Project Description:

A smart monitoring solution designed to safeguard business application health across infrastructure and deployment environments like VMs and containers. It collects and analyzes logs, tracks performance metrics, and verifies API accessibility to ensure seamless operations. Leveraging advanced intelligence for anomaly detection and predictive insights, the platform delivers proactive alerts and actionable recommendations for resilience and compliance.

#### Technologies / Skills

Full stack .NET

#### Profile

Bac + 5

#### Duration

6 Months

#### Number of slots

2 Slots

### 3. Secure AI Assistant for Conversational Access to Documents and Emails

---

#### Project Description:

A secure application that lets users converse with their documents and emails to find answers, summarize, and draft content. It supports on-premise models for data sovereignty or cloud AI for elastic scale—without changing how users work.

#### Technologies / Skills

AI integration, Full stack

#### Profile

Bac + 5

#### Duration

6 Months

#### Number of slots

2 Slots

## 4. AI-Driven Crisis Simulation and Resilience Testing Platform

### Project Description:

Build an AI-powered platform that challenges conventional crisis planning. It simulates unpredictable scenarios, adapts to participant choices, and reveals hidden vulnerabilities testing resilience in ways no static plan can anticipate.

#### Technologies / Skills

AI integration, Full stack

#### Profile

Bac + 5

#### Duration

6 Months

#### Number of slots

2 Slots

## 5. AI Content Orchestration Agent

---

### Project Description:

Building an AI system where specialized agents work together to autonomously run your content engine from discovering trends and generating platform-native posts to scheduling, publishing, and optimizing performance so your brand stays consistently relevant without constant manual effort.

#### Technologies / Skills

AI agent , azure ai, .net, python, rest apis

#### Profile

Bac + 5

#### Duration

6 Months

#### Number of slots

2 Slots

## 6. Intelligent HR Assistant

### Project Description:

Developing a specialized AI agent system designed to automate repetitive HR administrative tasks while maintaining human oversight and compliance.

#### Technologies / Skills

AI agent , azure ai, .net, python, rest apis

#### Profile

Bac + 5

#### Duration

6 Months

#### Number of slots

2 Slots

## 7. Zero Trust Enforcement & Validation Simulator

---

### Project Description:

A simulation platform that automatically and continuously validates that every access request is enforced exactly as intended across all six Microsoft Zero Trust pillars and principles.

#### Technologies / Skills

Zero Trust, IAM, Compliance & Regulations, Scripting & Programming

#### Profile

Bac + 5

#### Duration

4-6 Months

#### Number of slots

2 Slots

[HR@consultim-it.com](mailto:HR@consultim-it.com)

## 8. Quantitative Cyber-Resilience Validation Framework (QCRVF)

### Project Description:

A unique framework that quantitatively measures the link between security operations and disaster recovery using Microsoft tools.

#### Technologies / Skills

IAM, XDR, Zero Trust, SIEM, Programming & Scripting

#### Profile

Bac + 5

#### Duration

4-6 Months

#### Number of slots

2 Slots

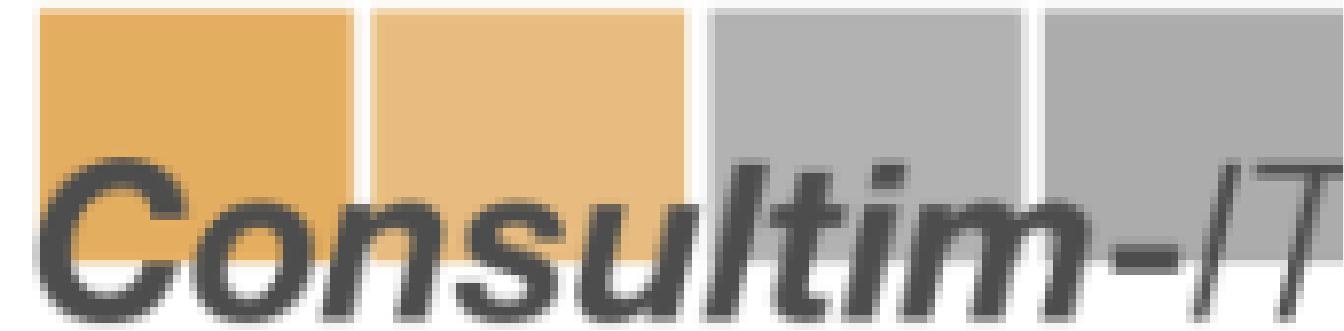

## 9. Automated Intune Configuration Auditing, MDE Validation, and Proactive Remediation Pipeline

---

### Project Description:

A platform that automates Microsoft Intune auditing by treating security policies as code. It uses PowerShell and the Graph API to compare live settings against a perfect "Golden Standard" in a version-controlled system.

Technologies / Skills	Profile	Duration	Number of slots
EDR, Compliance & Regulations, Scripting & Programming	Bac + 5	4-6 Months	2 Slots
