# Welcome dear intern !

## About Us

BitByte is a Delaware-incorporated U.S. company created by three cofounders and supported by experts in AI and software engineering. We build AI-native products that solve real problems and deliver clear value. Our work includes Jobbydone, an intelligent recruitment system that helps companies identify qualified candidates instantly, and Voybee, a suite of automated AI and voice-assistant technologies. We also develop additional SaaS AI-driven projects focused on automation, productivity, and applied intelligence. Nine months after launch, BitByte is gaining traction and expanding its operations into Qatar, strengthening its position as a growing technology company.

## Team Values

We value respect, knowledge sharing, integrity, and professionalism. We believe in helping each team member grow, learn, and become more confident and qualified in their work. Each team member is valued and important. We maintain strong communication, take responsibility for our tasks, and act with honesty in everything we do. We work together, support each other, and make sure everyone has a meaningful role in our common goals. Our projects are built to be sustainable, useful, and impactful for the people who depend on them.

# Vision and mission

what we want to **be** and what it take to reach our **goal**

## Our **vision**

Our vision is to grow into a stable, trusted, and long-lasting technology company that creates real value for people and contributes positively to society. We aim to build a workplace where every team member feels supported, learns continuously, and develops both professionally and personally. As we expand, we want to move step by step, enter new markets responsibly, and stay consistent with our values. We strive for BitByte to be recognized for the quality of its products, the reliability of its work, and the meaningful impact it brings to the communities and industries we serve.

## Our **Mission**

Our mission is to develop AI products that genuinely help people and organizations in their everyday tasks. We focus on creating tools that are simple, useful, and accessible, whether in hiring, automation, or digital productivity. We work with honesty, responsibility, and continuous improvement, aiming to build technology that saves time, reduces effort, and provides long-term value. BitByte's mission is not only to innovate, but to create solutions that improve the way people work and make technology feel more supportive and human.

# Interns' testimonials

“

”

**Abderrahmen – Polytechnique, Sousse**

It was a very good experience overall. I worked on concrete tasks that helped me improve both technically and professionally. The team was supportive and available when needed, while still giving me enough independence to grow. By the end of the internship, I felt more confident in my skills and better prepared for real work environments.

“

”

**Islem –ISG Tunis**

I loved the team, the vibe, and the way everyone makes sure every task gets done properly. I discovered in myself that I can do things I didn't know I was capable of. I worked on real business tasks like outreach, market research, and partner discussions, not just theory, and seeing real results after taking action was exciting. It was a great experience.

**Houssemeddine – FSB, Bizerte**

It was a positive experience. I worked on real features, learned new skills, and felt respected by the team. I was trusted with tasks that actually mattered, like improving parts of the product that were later used by the team, and I could directly see the impact of my work.

**Asser –Esprit, Tunis**

It was a challenging but rewarding experience. Some tasks pushed me out of my comfort zone, but that's where I learned the most. I made mistakes, fixed them, and ended the internship with a much clearer understanding of my strengths and what I still need to improve.

**Fakher – Leibniz University Hannover – Germany**

At Jobbydone, I learned what product thinking really means, talking to early adopters, defining problems clearly, and iterating fast. I saw how every choice connects to a task later. It taught me the right perspective on building software technologies.

# Proposed topics

# Software & AI Engineering

**Duration:** 4 - 6 months

**Type:** Remote

**Tech Stack :**

- Azure
- Django
- Qdrant
- PostgreSQL
- OpenAI

## Description

The interns will work on backend development using Django and manage multi-database systems with PostgreSQL and Qdrant. They'll integrate AI/GenAI services, build RAG pipelines, and collaborate on CI/CD automation for smooth deployments.

## Main Tasks

- Develop backend features with Django.
- Manage PostgreSQL and Qdrant for structured data and vector search.
- Integrate AI/GenAI services.
- Build and optimize RAG pipelines.
- Deploy and configure services on Azure.
- Improve and maintain CI/CD pipelines.
- Participate in code reviews, debugging, and documentation.

## Skills Expected

- Solid knowledge of Python, Django, and SQL.
- Experience or strong interest in AI/GenAI integration, embeddings, vector DBs, and RAG.
- Familiarity with CI/CD and Git workflows.
- Ability to collaborate and communicate effectively.

# UI / UX Design

**Duration:** 2 - 4 months

**Type:** Remote

**Tech Stack :**

- Figma
- Framer
- Lottie

## Description

The intern will work on UI/UX design for both mobile and web applications, ensuring consistency, usability, and smooth collaboration with development teams.

## Main Tasks

- Design user interfaces and user flows for mobile and web applications using Figma.
- Create wireframes, high-fidelity mockups, and interactive prototypes.
- Define and maintain design systems, components, and UI guidelines.
- Adapt designs for responsive web and mobile-specific constraints.
- Collaborate closely with developers to ensure accurate implementation.
- Review implemented interfaces and provide UI/UX feedback and improvements.
- Contribute to design documentation and handoff specifications.

## Skills Expected

- Strong experience with Figma and Framer is a plus.
- Solid understanding of UI/UX principles, usability, and interaction design.
- Knowledge of responsive design for web and mobile platforms.
- Familiarity with web and mobile development constraints.
- Ability to work with developers and communicate design decisions clearly.
- Attention to detail and consistency across platforms.

# Full-Stack Development

**Duration:** 4 - 6 months

**Tech Stack :** • Flutter  
• GetX  
• Django

**Type:** Remote

## Description

The intern will work on Flutter mobile development, contributing to the implementation and maintenance of application features and their integration with a Django-based backend.

## Main Tasks

- Develop and maintain mobile application features using Flutter (Dart).
- Implement state management and business logic using GetX.
- Build responsive screens compatible with multiple device sizes.
- Implement navigation, routing, and in-app animations.
- Integrate and consume Django REST APIs.
- Handle asynchronous data flows, error states, and loading states.
- Collaborate on authentication flows, API contracts, and data models.
- Perform performance optimization on mobile and network usage.
- Participate in code reviews and contribute to technical documentation.

## Skills Expected

- Good knowledge of Flutter and Dart.
- Experience with GetX.
- Understanding of Flutter widget architecture and layout system.
- Familiarity with Python / Django.
- Experience with REST APIs, and async programming.
- Experience with responsive mobile development.
- Ability to work in a team and communicate technical decisions clearly.

# Full-Stack Development

**Duration:** 4 - 6 months

**Tech Stack :** • Angular TS  
• Django

**Type:** Remote

## Description

The intern will work on web application development, contributing to the implementation and maintenance of frontend features using Angular, and their integration with a Django-based backend.

## Main Tasks

- Develop and maintain web application features using Angular and TypeScript.
- Implement component-based architecture and application logic.
- Build responsive web interfaces compatible with different screen sizes and browsers.
- Configure routing, guards, and navigation flows.
- Integrate and consume Django REST APIs.
- Perform basic performance optimization and frontend refactoring.
- Participate in code reviews and contribute to technical documentation.

## Skills Expected

- Good knowledge of Angular and TypeScript.
- Understanding of component-based architecture and Angular lifecycle.
- Familiarity with Django.
- Experience with REST APIs, JSON handling, and async programming.
- Knowledge of responsive web development and browser constraints.
- Ability to work in a team and communicate technical decisions clearly.

# Business Development

**Duration:** 4 - 6 months

**Type:** Remote

**Tech Stack :**

- Hubspot/Salesforce
- Apollo.io
- LinkedIn
- Sales Navigator
- Jasper

## Description

The intern will support BitByte's growth by helping identify new opportunities, assisting with outreach, and contributing to the development of partnerships. They will work with the team to understand market needs, prepare materials, and support client-related activities.

## Main Tasks

- Research and identify potential clients, partners, and markets.
- Assist in lead generation through outreach campaigns
- Qualify inbound and outbound leads and maintain an organized CRM database
- Participate in client meetings, demos, and follow-ups alongside the sales team
- Contribute to follow-ups and tracking ongoing opportunities.
- Assist in analyzing competitor activity and market trends.
- Monitor industry trends, competitor activities, and market developments
- Contribute to the development of partnership strategies.

## Skills Expected

- Ability to work with data and organize information clearly.
- Professional attitude and willingness to learn & manage deadlines.
- Strong interpersonal and communication skills (written and verbal) in English.
- Confident, persuasive, and comfortable initiating conversations with prospects
- Analytical mindset with the ability to research and synthesize market data
- Organized, self-driven, and able to work independently with minimal supervision
- Familiarity with CRM tools or similar is a plus
- Proficiency in AI tools and prompting techniques is an advantage

# Social media Management

**Duration:** 4 - 6 months

**Type:** Remote

**Tech Stack :**

- Hootsuite/Buffer
- Google Analytics,
- Linkedin Analytics
- Canva
- Meta Business Suite

## Description

The intern will play a key role in developing and executing Jobbydone's social media strategy, building brand awareness, and engaging our target audience of job seekers and recruiters. This is an excellent opportunity for a motivated individual to gain hands-on experience in a fast-paced startup environment while contributing directly to the company's growth.

## Main Tasks

- Monitor social media channels, and foster community engagement
- Design simple visuals using Canva or Figma.
- Support influencer outreach and partnership initiatives.
- Assist in planning and executing digital marketing campaigns aligned with product launches and company milestones
- Track, analyze, and report on key performance metrics (reach, engagement, follower growth, conversions)
- Contribute to the development of a consistent brand voice and content calendar

## Skills Expected

- Creativity and ability to design clean, engaging content.
- Strong understanding of social media platforms, algorithms, and best practices
- Basic knowledge of graphic design tools
- Ability to interpret data and translate insights into actionable recommendations
- Creative mindset with a keen eye for visual storytelling and trending content formats
- Comfortable using AI tools and crafting effective prompts
