- Collaborate with a talented and supportive team.
- Gain expertise in top-tier technologies and methodologies.

## Our Values

- Excellence
- Responsibility
- Growth
- Innovation
- Transparency

# Project 1

## Helpdesk Ticketing System

**Tech Stack:** Java Spring Boot, Angular

**Objective:** Build a complete internal Helpdesk platform to manage IT support requests, ticket lifecycle, user roles, dashboards, and notifications.

**Key Features:**

- Ticket lifecycle management.
- Prioritization and deadline settings.
- Dashboard and notifications.

# Project 2

## SmartFleet: Intelligent Fleet Management & Telematics Platform

**Tech Stack:** NestJS, Angular

**Objective:** Develop a modern fleet-management solution with vehicle tracking, contracts, billing, reporting, and telematics features.

**Key Features:**

- Vehicle lifecycle management.
- Maintenance scheduling.
- Contracts & reservations.
- Driver assignments

# Project 3

## Digital Marketing

**Tech Stack:** Social Media Platforms, SEO Tools, Analytics Software

**Objective:** Build and execute a comprehensive digital marketing strategy to increase brand visibility and lead generation.

**Key Features:**

- Content creation and management.
- Campaign tracking and performance optimization.
- SEO and paid advertising strategies.
