📍 SFAX, TUNISIA

WEB-BASED ERP SAAS INTERNSHIP

Design and develop a web-based ERP SaaS platform composed of multiple modules such as purchasing and sales management, price comparison, stock management, real-time treasury tracking, and project management. The project focuses on modular design, scalability, and real-world business process implementation.

TECHNOLOGIES: WEB TECHNOLOGIES, REST APIs, DATABASE DESIGN, SAAS ARCHITECTURE

WEB APP

AI CLOTHES TRY-ON INTERNSHIP

Build an AI-powered virtual clothes try-on system using image generation and transformation models. The project focuses on applying computer vision and deep learning techniques to realistically overlay clothing on human images while preserving textures, proportions, and visual realism.

TECHNOLOGIES: AI IMAGE MODELS (NANO BANANA OR SIMILAR), PYTHON, COMPUTER VISION, DEEP LEARNING

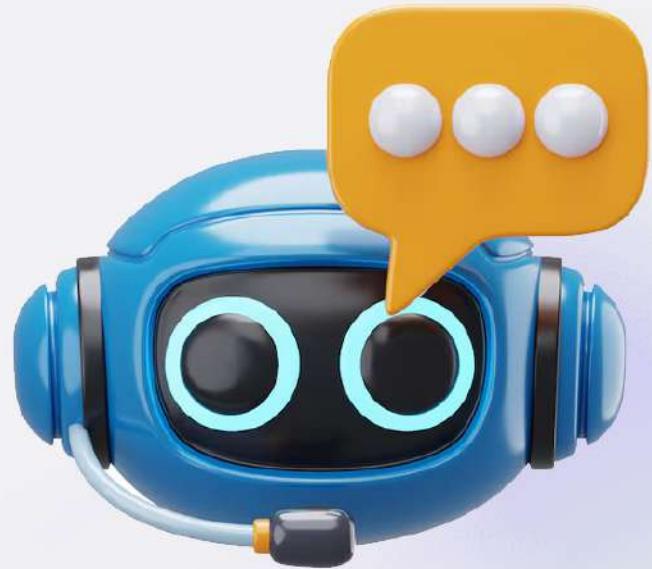

• AI

CUSTOM FINE-TUNED CHATBOT INTERNSHIP

Design and build a custom chatbot based on a large language model, fine-tuned for specific business or domain needs. You will work on data preparation, model customization, prompt optimization, and API integration to deliver accurate and context-aware conversational experiences.

TECHNOLOGIES: LARGE LANGUAGE MODELS (LLMS), PYTHON, PROMPT ENGINEERING, FINE-TUNING, APIs

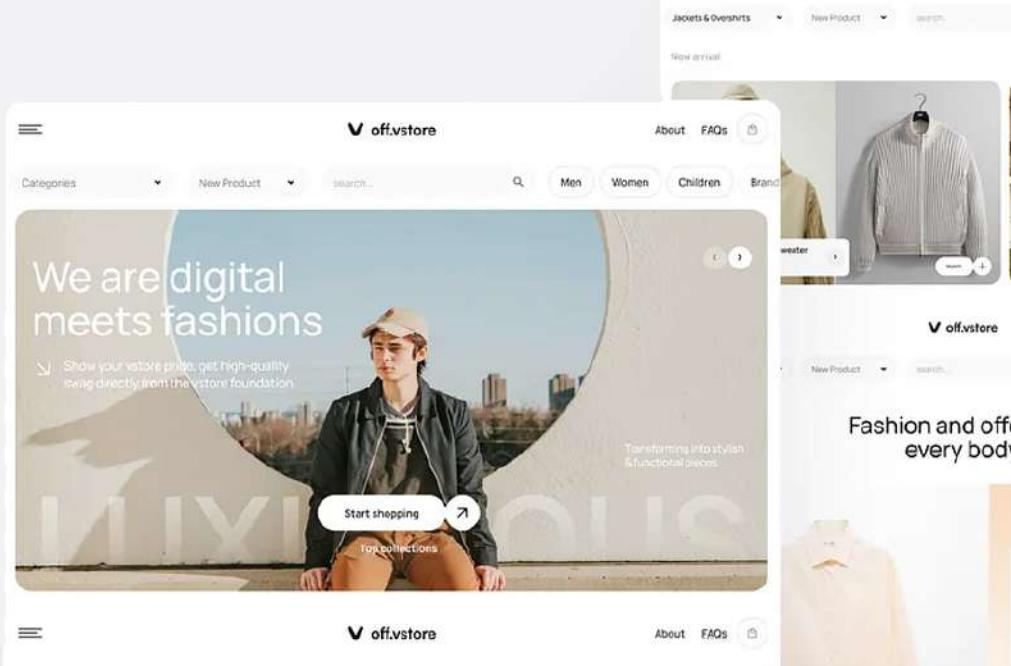

E-COMMERCE WEB APPLICATION INTERNSHIP

Develop a full-featured e-commerce web application using Angular for the frontend and Strapi as a headless backend. You will implement product management, user authentication, shopping cart functionality, and API integration while following modern web architecture and best practices.

TECHNOLOGIES: ANGULAR, TYPESCRIPT, STRAPI (HEADLESS CMS), REST APIs, HTML, CSS

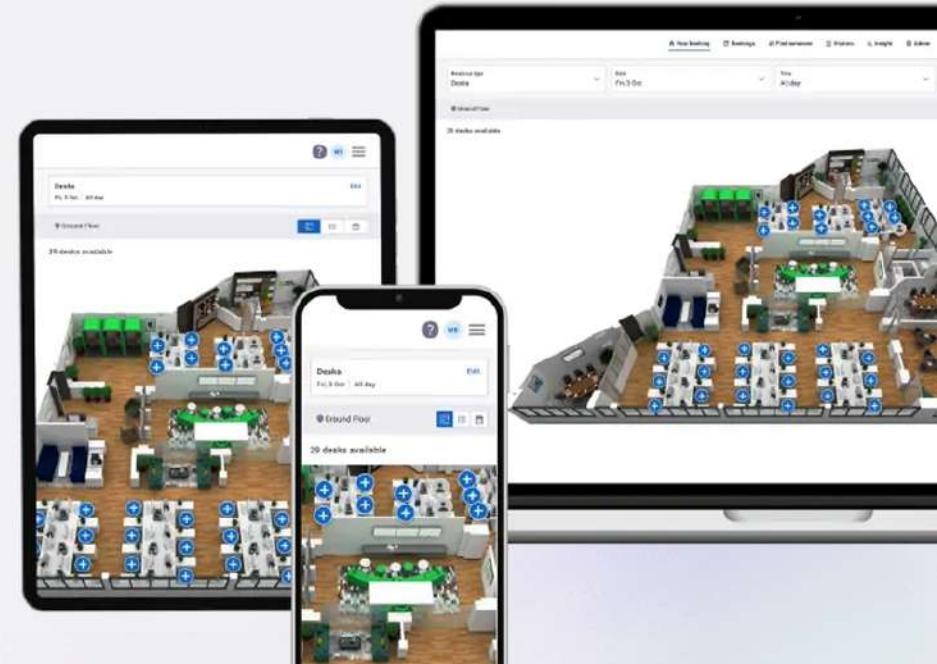

• WEB APP

COWORKING SPACE RESERVATION MOBILE APP INTERNSHIP

Develop a mobile application for coworking space reservations and appointment management, featuring both user and admin roles. The app will allow users to book spaces and appointments, while administrators manage availability, schedules, and reservations through a dedicated interface.

TECHNOLOGIES: FLUTTER / REACT NATIVE, REST APIs, AUTHENTICATION, ROLE-BASED ACCESS

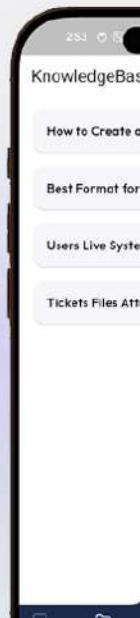

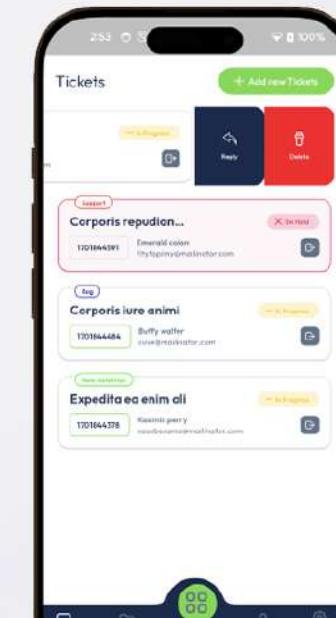

• MOBILE APP

IT SUPPORT TICKETING MOBILE APP INTERNSHIP

Develop a mobile application for managing IT support tickets, allowing users to submit issues and track their status while enabling administrators to assign, prioritize, and resolve requests. The project focuses on usability, workflow efficiency, and real-world support processes.

TECHNOLOGIES: FLUTTER / REACT NATIVE, REST APIs, AUTHENTICATION, NOTIFICATIONS

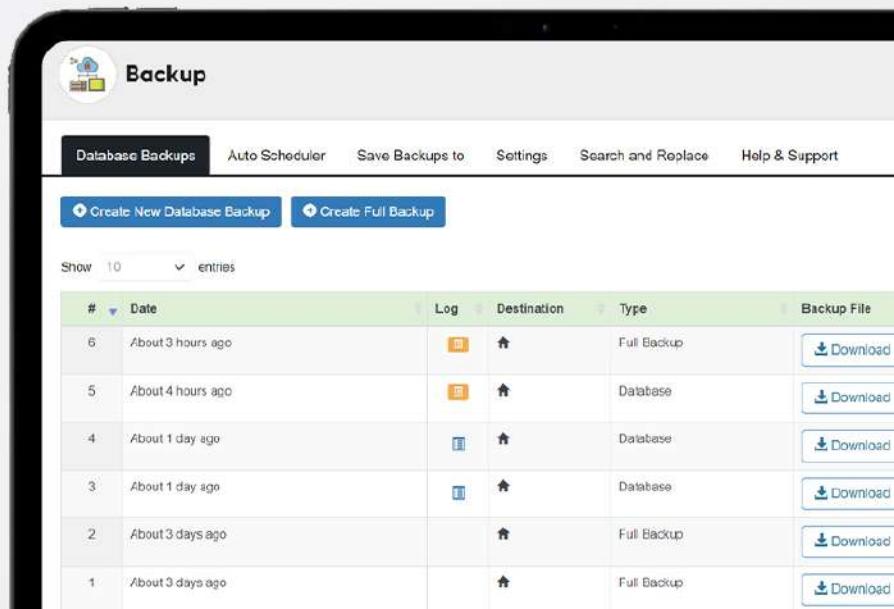

AUTOMATED SQL BACKUP SYSTEM INTERNSHIP

Design and implement an automated backup system for SQL databases with auto-discovery capabilities. The solution will detect databases, schedule backups, and securely store them in the cloud while ensuring reliability, monitoring, and easy recovery.

TECHNOLOGIES: SQL SERVER / MYSQL / POSTGRESQL, SCRIPTING, CLOUD STORAGE, AUTOMATION
