What is SpeakDuo

SpeakDuo is a language learning platform that helps people practice real conversation through global communities, partner sessions, group rooms, and AI speaking tools that support daily speaking practice.

Life at SpeakDuo

At SpeakDuo you learn by building, testing, and delivering real product features used by real users. You work closely with engineers, designers, and founders.

- * **Curiosity**
- * **Ownership**
- * **Craftsmanship**
- * **Speed and iteration**
- * **Clear communication**

What We Look For

We value people who create things and take initiative.

If you have built something on your own or with a team, we want to see it.

Please include any of the following:

- * Personal or team projects
- * University projects
- * Hackathon work
- * Apps, tools, websites, content, designs, videos
- * Anything you experimented with or shipped

Portfolio links are highly encouraged:

- * GitHub
- * Behance
- * LinkedIn
- * TikTok or Instagram (if relevant)
- * Personal website or Notion page

What We Work On

Language community features

Full-stack product development

Real-time conversation tools

AI speaking practice software

Growth, marketing, and content systems

Marketing Strategy

Analyze markets, study competitors, understand user needs, and help plan growth experiments.

Duration:

4 to 6 months

Deliverables:

- **Market notes**
- **User insights**
- **Growth ideas**
- **Basic KPI dashboards**

Skills

- **Analytical thinking**
- **Clear writing**

Social Media and Content

Create content, prepare posts, test video formats, manage platforms, and track performance.

Duration:

4 to 6 months

Deliverables:

- **Weekly content plan**
- **Short videos**
- **Social posts**
- **Monthly reports**

Skills

- **Creativity**
- **Comfort with TikTok, IG, or LinkedIn**
- **Basic design tools**

3

Backend and DevOps

Work on backend services and infrastructure that support conversation rooms, language communities, and AI speaking practice.

Duration:

4 to 6 months

Deliverables:

- **Backend APIs**
- **CI/CD improvements**
- **Monitoring tools**
- **Service documentation**

Tech Stack:

- **Python**
- **FastAPI**
- **PostgreSQL**
- **Redis**
- **Docker**
- **Kubernetes**

Skills:

- **Python basics**
- **Understanding of containers**
- **Interest in cloud systems**

Full Stack Engineering

Build features for dashboards, community tools, user flows, and internal systems.

Duration:

4 to 6 months

Deliverables:

- **Functional features**
- **UI components**
- **API integrations**

Tech Stack:

- **React**
- **TypeScript**
- **Tailwind**
- **Python**
- **PostgreSQL**

Skills:

- **React or Next.js knowledge**
- **Frontend and backend basics**

Language Teaching (English, German, Spanish)

Lead group conversation lessons, guide learners during speaking activities, prepare simple lesson materials, help with community events, and track learner progress.

Deliverables:

- **Group sessions (online)**
- **Lesson materials**
- **Progress notes**

Skills:

- **Strong language level**
- **Clear communication**
- **Comfort leading groups (online)**
